DIFFUSION

Main (front) sound system adapted to the venue with 2X31 band equalizer.

CONSOLE

32 tracks/at least 12 starts with 4 post faders
 The console should be placed as close as possible to the ideal listening zone.

MONITORS

- 6 independent monitor circuits with 31-band equalisation per circuit.
- 7 wedges – double wedges for circuits 1.

The monitors should be handled by preference by a technician from the venue on a separate console. They can be handled from the front of the house. In this case, please foresee at least 3 AUX starts in pre fader on the main console.

PERIPHERAL DEVICES
